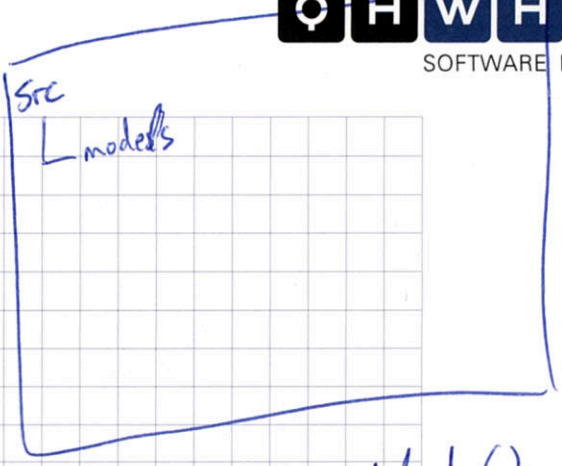
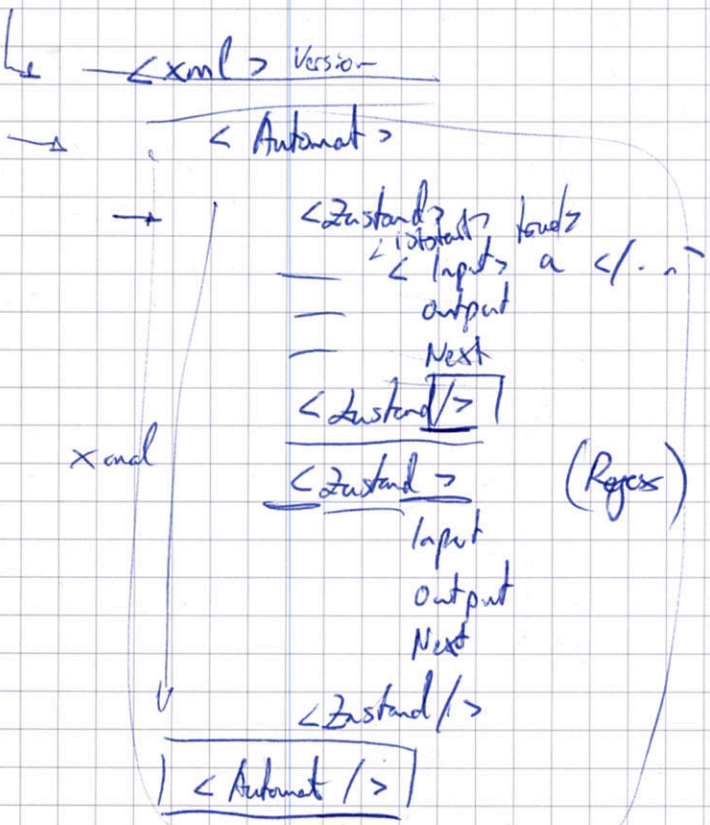
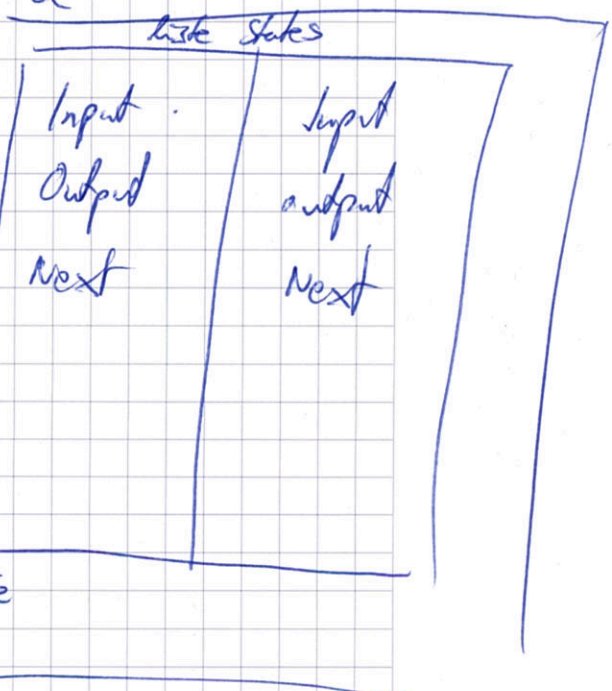
JSON Ausgabe zweckmäßig?

Effizienz Klartext





a = new Automat();
(while for) a.setListZustand(
Z1 = new Zustand()
{ Input
=
}
a.liste.add(z1)



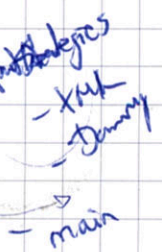
Strategy Design Pattern:

```
interface IEnte
{
  void fliegen();
}
```

```
public class Holzente implements IEnte
{
  void fliegen()
  { // kann nicht
  }
}
```

```
class Wildente extends BaseAutomat implements IEnte
{
  void fliegen()
  { // fliegt
  }
}
```

main:

```
BaseAutomat e = new Holzente()
e.fliegen();
e = new Wildente()
e.fliegen();
```


```
abstract BaseAutomat
{ IEnte enteImpl;
  setter
}
```
